

We're working in your building, to get recycling right.

<Council Name> is working hard with the State and Federal Government to improve our recycling system. But to do that, **we need your help** to get your building's recycling right.

We understand it's not always easy to know what to put where, so over the next few weeks, **we'll be providing your building with some materials** to make things easier.

→ **Look out for the new materials in your bin area** and help your household and building to get recycling right.

<Logo/s>

Recycling works, with your help.

70% of people know that soft, scrunchable plastics can't go in your kerbside recycling bin. This includes plastic bags containing recyclable items. But we need everyone to get it right.

Don't let mistakes waste your recycling efforts.

Make sure everyone in your household knows to:

**Put soft plastic in
the rubbish** ✓

or collect and take to your
supermarket REDcycle bin ✓✓

**Put your recycling
in loose** ✓

(to your kerbside yellow
recycling bin)

This will help us turn your recycling back into valuable new products, saving energy & raw materials, while creating jobs and reducing landfill.

Did you know? 'Soft plastic' means flexible, scrunchable plastic packaging including grocery bags, bread & pasta/rice bags, frozen food & veggie bags, snack wrappers, clear film, bubble wrap, etc.
