

WE'RE MAKING A POINT.

We've partnered with **Nespresso** to provide you with an aluminium capsule recycling collection point in the office. Aluminium capsule recycling is as easy as 1-2-3 and **FREE**.

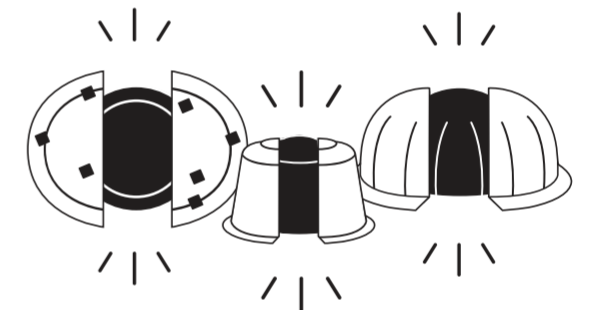

STEP 1

Place your used aluminium capsules in the Bulk Recycling Box provided. You can also bring in your used aluminium capsules from home. All used aluminium capsules are recycled together.

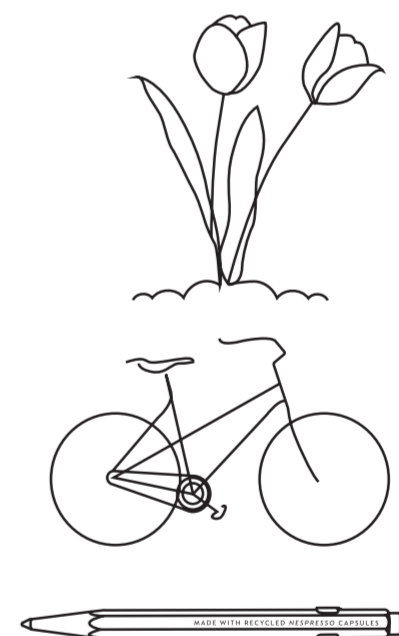

STEP 2

The Bulk Recycling Box is collected and sent to a facility which uses specialised equipment to separate the aluminium and coffee.

STEP 3

The used coffee grounds are turned into a rich and nutritious compost. The aluminium is compacted and goes back into the aluminium industry, where it can be reused to create a variety of new products such as pens, aluminium cans and even bicycles.

BY RECYCLING TODAY, THE CAPSULES WE USE CAN GO ON TO HAVE A SECOND LIFE.
