

We're working in your street, to get recycling right.

<Council Name> is working hard with the State and Federal Government to improve our recycling system. But to do that, **we need your help** to get your street's recycling right.

We understand it's not always easy to know what to put where, so over the next few weeks, **we'll be giving your street some feedback** to make things easier.

Look out for our bin tags and postcards and help your household and street to get recycling right.

<Logo/contact>

Recycling works, with your help.

70% of people know that soft, crunchable plastics can't go in your kerbside recycling bin. This includes plastic bags containing recyclable items.

And it seems your household know this too as we

couldn't see any of these in your bin today - good work!

To keep recycling these right and get your green tag next time we visit, make sure everyone in your household knows to:

Put soft plastic in the rubbish ✓

or collect and take to your supermarket REDcycle bin ✓✓

Put your recycling in loose ✓

(to your kerbside yellow recycling bin)

This will help us turn your recycling back into valuable new products, saving energy & raw materials, while creating jobs and reducing landfill.
